

Smith Machine + Rack

SKU: EL-SM3

Product Images

Short Description

The Titanium Strength Elite Series Smith Machine is the perfect combination of a Smith Machine and a Half Rack. Designed for demanding commercial environments, this machine ensures optimal quality and performance thanks to its high-quality bearing system, providing smooth and fluid movements, and its safety lock system, which instills complete confidence in users.

With a vertical movement trajectory and 13 locking positions, this machine adapts to different user heights and a

variety of exercises. From squats and chest presses to pull-ups, it ensures stability and control in every movement, offering an exceptional training experience.

Upgrade your gym with the Titanium Strength Elite Series Smith Machine and provide your clients with top-notch equipment to achieve their fitness goals with confidence.

Description

Why should you buy the Titanium Strength Elite Series Smith Machine + Rack?

COUNTERBALANCED SMITH MACHINE

The Titanium Strength Elite Series Smith Machine has been designed to provide an unparalleled training experience. Unlike other machines, the counterbalanced Smith machine offsets the weight of the bar, allowing the user to focus on lifting the actual weight of the added plates without considering the additional load of the bar. With an initial resistance of 0 kg and an impressive load capacity of 300 kg, this machine is designed to accommodate users of all levels, from beginners to experienced athletes.

ROBUST AND DURABLE DESIGN

This machine has been specially designed for commercial use, for any gym or sports center seeking quality in their equipment. It boasts a super-stable structure made of high-strength 50 x 100 mm steel tubing. Each component has been carefully selected and tested to withstand the rigors of intense training, ensuring long-term durability and safety.

GUARANTEED SAFETY

At Titanium Strength, safety is our top priority. That's why our professional Smith Machine is equipped with adjustable safety stops that allow you to set limits on movement, providing peace of mind to users while they train alone. Additionally, this machine also includes safety spotter arms, providing extra confidence for performing free weight exercises, knowing that you will always have a reliable safety system to rely on.

PULL-UP BAR

The Titanium Strength Elite Series Smith Machine goes beyond by integrating a pull-up bar, significantly expanding the available training options.

SMOOTH AND FLUID MOVEMENT

This professional machine stands out for its linear bearing system, ensuring smooth and fluid movement with every repetition. Thanks to this technology, annoying frictions are avoided, allowing the user to focus on executing exercises correctly and effectively, maximizing their results.

INTEGRATED PLATE HOLDERS

In pursuit of maximum comfort and efficiency, the Titanium Strength Elite Series Smith Machine is equipped with plate holders. These holders allow you to make quick and seamless transitions between drop sets, without

unnecessary interruptions. Furthermore, keeping the fitness area tidy and organized will be easier, as you can securely and conveniently store the plate, optimizing training time and minimizing disruptions.
