

Dual Adjustable High / Low Pulleys THL

SKU: THL

Product Images

Short Description

The Titanium Strength Dual Adjustable Pulley system makes active training possible for everyone. With cable ratio 2:1

People who just want to have a good workout, people with a practice indication and even wheelchair users can use the Titanium Strength Dual Adjustable High / Low Pulleys. This is due to the large variety of weight variations, the extremely simple operation, and the accessibility of the double pulley.

Description

Why you should buy the Titanium Strength THL Double Pulley?

The cables fold up to a weight of 1984lb and guarantee you years of training pleasure. All pulleys are mounted and provide an extremely smooth motion sequence that contributes to an even better workout.

The Titanium Strength Dual Adjustable High / Low Pulleys is a multi-functional pulley device with full exercise possibilities on 2 square meters. This pulley makes it possible to train virtually all human movements. This applies to single movements, but also to complex movements. Because the movement has a free character, along with strength it also trains coordination.

Features

- Free cable design, can achieve high pulley, low pulley, etc.
- High-strength steel tube construction with two-tone dark grey and silver-grey powder coating
- Fiberglass reinforced nylon pulleys
- Multi-position pulley
- You can perform a variety of exercises
